

Company Description

LOGIKA Corporation, based in Chicago, Illinois, is a leading provider of customized Internet search solutions using our proprietary web searching and indexing technology. Our name, LOGIKA, derived from *logic*, was chosen as a means to convey our intricate knowledge of computing at its most fundamental level. This level of understanding enables us to create efficient and effective search solutions that benefit the Web community.

The core enabler behind our ability to introduce numerous innovative search solutions is the LOGIKA Proprietary Search System (LPSS). The LPSS is the result of nearly two years of extensive research and development. The LPSS technology portfolio includes custom crawling, indexing, and data retrieval modules. Whether your needs include seamless searching capability from your corporate website, or large scale portals for finding topic specific content on the Web, the LPSS can serve them all.

Management Team

The LOGIKA Management Team brings combined experience in leading companies, building startups, and developing product strategies at all levels. We are an enthusiastic team with a sense of humor and a spirited approach, creating an energized atmosphere where the goal is to become the premier provider of Internet Search Solutions.

Summary

At LOGIKA, when it comes to the pursuit of finding new and better ways to make information on the Web more accessible, The Search is ON.tm
